

The Fourth Eilene M. Galloway Symposium on Critical Issues in Space Law

Peaceful Purposes and Uses of Outer Space

"The dramatic orbiting of Sputnik over all nations on October 4, 1957 raised fears of weapons of mass destruction, but nations responded by organizing with hope for peace. International space cooperation has brought the world 47 years of safety and order to develop benefits for all humankind: profitable global satellite communications systems, new industries from remote sensing, economic savings from improved meteorology, advances in agriculture, medicine, and many more applications from knowledge obtained from space. This is a remarkable achievement that we must protect against any influence that could destroy the system of international space cooperation."

- Eilene Galloway, *Journal of Space Law*, Vol. 30, No. 2, pg. 311. (2004)
